

TEACHER SUBJECT SPECIALISM TRAINING (TSST)

MATHS

TSST Maths Training 2017-2018

For the third consecutive year Twyford CE High School continues to offer subject specialism training in secondary mathematics for non-specialist teachers, returning teachers and those teachers wishing to improve their subject knowledge in tougher areas of the mathematics curriculum. This highly successful CPD programme consists of eight free twilight workshops approved and funded by the Department for Education and supported by the Further Maths Support Programme. Workshops are designed to boost subject knowledge, improve pedagogy and increase teachers' confidence in the delivery of secondary mathematics to Key Stages 4 and 5. Workshops are suited to current teachers delivering Maths as a non-specialist subject, newly qualified teachers, overseas trained teachers and those returning to teaching.

**WORKSHOPS RUN
FROM 4.30-6.30PM**
